

Rely On Our Performance

"We've been building 'keepers' for more than 37 years!"

Bill Keegan, Sr.
President & CEO

If your flow control valves require long life cycles and minimal maintenance at temperatures up to 1500 degrees F, PDC has the ideal butterfly valve solution.

Available in sizes of 2" through 60" in foundry cast iron and steel alloys, our butterfly control valves are machined to tight tolerances that ensure low operating and maintenance costs.

A wide range of quality valve designs, combined with customizable automation packages, give you precise control of your flow media.

For industrial or municipal media control in Power Generation, Furnace, Wastewater, Gas Compression or Combustion, and LNG applications, call **800.PDC.4070** or **724.695.3440**.

Value in Valves
