

# The Performance You Expect

If your flow control valves require long life cycles at **temperatures up to 1500°F**, depend on PDC for the ideal butterfly valve solution.

Available in **sizes of 2" through 60"** in **foundry cast iron and steel alloys**, our butterfly control valves are machined to tight tolerances for enhancing optimum performance of your furnace, and reducing operating and maintenance costs.

Our wide range of quality valve designs, combined with customizable automation packages, give you precise control of your flow media.

For industrial and furnace media control in **Power Generation, Gas Compression, Combustion and LNG** applications, call **800.PDC.4070** or **724.695.3440**.
